

SERIES[P]

SERIES[P]

Scandinavian design is timeless and has its origins in our love of light and nature. Series[P] desks are grounded in this tradition with clean lines, functional design and bright natural colours. They are designed with the user in mind, with consideration and care. Carefully designed products which through their simple basic idea provides everyday quality.

A STYLISH AND SMART CHOICE

Series[P] is a range of functional sit/stand desks which is characterised by its sleek design, ergonomic mindset and numerous smart benefits. As the desks are height adjustable, you can vary the working height which offers many benefits. The various top and underframe options make them easy to install and simple to combine with other interior design. There are many smart options available, for instance a sliding top which makes it easy to hide cables and outlets to give an uncluttered impression. The desks are easy to assemble and adjust if there is a need for change. They comply with the Nordic Ecolabel criteria and are issued with the Möbelfakta and FSC label, meaning they are an eco-friendly alternative.

VARIATION IS IMPORTANT

From an ergonomics perspective, it is important to vary between sitting and standing. It is easy to vary the working posture from sitting to standing with the height adjustable Series[P] desks. This gets the blood circulation going and reduces the risk of repetitive strain injuries (RSI). Get the best possible working posture by also combining the desk with one of our ergonomic task chairs.

SCANDINAVIAN LINES

Series[P] desks have a classic design with appealing Scandinavian lines. The finish is stylish and simple, with a profile along the short edge that hides the motor bracket and frame. The tops are available in different finishes and materials to make it easy to find a design that best suits your environment. A chamfered edge top is also available for a classical, floating appearance.

FUNCTIONS & OPTIONS

HEIGHT ADJUSTABLE

The Series[P] sit/stand desks are height adjustable with the simple touch of a button. The desk height is between 635 – 1 285 mm.

CABLE TRAY AND CABLE OUTLETS

It is easy to hide cables and sockets in the cable tray. Just pull the top towards you to access them.

EXCELLENT FUNCTIONALITY

The powerful motor gives the sit/stand desk immense lift capacity. The motor runs quietly meaning that all adjustments are done without making any noise.

CHAMFERED EDGE

A chamfered edge gives the desk a wonderful floating appearance.

EASY ACCESS STORAGE DRAWER

Ideal for pens and Post-it notes. Includes inbuilt tape holder.

POWERBOX

The cable box has three sockets, USB and network ports as well as a cable trap to ensure that superfluous cables are kept out of sight. This is ideal when the table is placed against a wall or where two tables are positioned back to back with, for instance, a screen between them.

LEG COLOURS - SILVER GREY

The square sit/stand leg (SSC) and the underframe are available in silver grey, white and black. Easy to adjust for uneven floors from the upper side of the foot.

WHITE

Select a table leg colour based on the tabletop you want to use. Combining white legs with a white top gives a uniform and sleek finish that fits many types of environments.

BLACK

Black table legs are a well-designed alternative in combination with the different tabletop selections for instance birch, beech, oak or light grey. Black legs give a classical and durable finish.

EASY ACCESS

You keep things clean and tidy by choosing a sliding top. Cables and sockets can be neatly hidden in the cable tray which is accessed by pulling the top towards you. This is ideal when the table is placed against a wall or where two tables are positioned back to back with, for instance, a screen between them.

TABLETOPS

There are different tabletop sizes and finishes to choose from.

DESK - Desk height 635-1,285 mm (SSC)
